1) A+++ (highest efficiency) to D (lowest efficiency).

2) Weighted Annual Energy Consumption is based on 160 drying cycles of the standard cotton program cotton dry at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used.

3) The standard cotton program cupboard dry used at full and partial load is the standard drying program to which the information in the label and the fiche relates. This program is suitable for drying normal wet cotton laundry and it is the most efficient program in terms of energy consumption for cotton.

4) A (highest efficiency) to G (lowest efficiency).

The device meets the European standards and directives in the current version at delivery:

- Low Voltage Directive (LVD) 2006/95/EC
- Electromagnetic Compatibility (EMC) Legislation Directive 2004/108/EC
